

Recommended Flooring Types by Area – Service Bay

1. Vehicle Service Area / Main Bay

RECOMMENDED FLOORING: Epoxy Resin Coating, Urethane Cement, Stout System

- Withstands heavy loads from vehicles and lifts
- Resistant to oil, grease, antifreeze, and automotive fluids
- Easy to clean, non-porous, and slip-resistant when textured
- Durable against abrasion from tools and equipment

2. Tire/Parts Storage Area

RECOMMENDED FLOORING: Polished/Densified Concrete, Epoxy Neat System

- Handles racking systems and tire movement
- Resists black scuffing and stains from rubber
- Smooth and flat for carts and forklifts

3. Workstations / Tool Zones

RECOMMENDED FLOORING: Urethane Cement with Cove Base, Epoxy Quartz System

- High impact resistance from dropped tools
- Easy cleanup and long life
- Optional colored striping for tool zone boundaries

4. Wash Bay / Detailing Area

RECOMMENDED FLOORING: Urethane Cement with Integral Cove, Textured Epoxy

- Excellent water resistance and fast drainage
- Slip resistant under wet conditions
- Withstands chemicals like detergents, degreasers, and waxes

5. Utility Rooms / Mechanical Areas

RECOMMENDED FLOORING: Epoxy with ESD or Anti-Microbial Additives, Stout System

- Resistance to utility leaks or equipment vibration
- Optional static control in electrical or compressor rooms

6. Restrooms / Locker Rooms

RECOMMENDED FLOORING: Seamless Epoxy Flake with Cove System, Urethane Cement, Quartz

- Non-Slip and waterproof
- Durable in humid or wet conditions
- Cleanable and sanitary

Page 2 – Service Bays

7. Office / Reception Areas within Service Centers

RECOMMENDED FLOORING: Commercial-Grade Carpet Tile, Polished Concrete, Flake Epoxy, Flex Guard 462, Scapes

- Comfort and appearance for customers and admin staff
- Easier acoustics and foot traffic management
- Durable and stain-resistant for daily use
