

STAMPED CONCRETE OVERLAY

PRODUCT INFORMATION

Durável SOM is a polymer modified cement coating that is easy to use when creating beautiful stamped concrete surfaces over existing plain concrete. Durável SOM can be added to any sound, non-moving and clean concrete with minimal height gain. Common hand tools are used to create natural-looking surfaces like stone, slate, brick, cobblestone, and wood, using stamp texture tools designed to work with an overlay. Add Durável OCP overlay color packs and In-Fluence water based stains to create natural looks. Durável SOM may be installed on indoor and exterior projects, and is suitable for freeze-thaw climates. Durável SOM is engineered to handle commercial vehicular traffic and is perfect for both commercial and residential projects. Durável packages overlay and repair mortars in weather-resistant plastic bags to extend product shelf life. Please help take care of the environment and take our empty bags to a recycling center!

SYSTEM ADVANTAGES

- ✓ Wide Range of Color Combinations
- ✓ Freeze-Thaw Resistant
- ✓ Premium Blend of Strengths
- ✓ Suitable for Vehicle Traffic
- ✓ Stamp and Carve Options

TYPICAL USES

- ✓ Entrances and Walkways
- ✓ Porches, Balconies, Patios
- ✓ Sidewalks and Driveways
- ✓ Commercial and Residential
- ✓ Outdoor Entertaining Areas

CUSTOM TEXTURES

Use common concrete stamps and skins to create beautiful textures like stone, brick, slate, and wood. Durável SOM can be carved into any pattern and size to meet the project requirements. Select from a nearly limitless combination of colors to complement any design.

RESIDENTIAL

Transform boring, plain concrete patios, walkways, and driveways into fabulous natural colors and textures. Overlaying existing concrete with Durável SOM avoids the extensive cost of tearing out your existing concrete. Projects can be completed without damaging your surrounding landscape.

COMMERCIAL

Increase the value of nearly any property by adding decorative stamped concrete. Using Durável SOM on existing concrete saves time, mess, and cost typically associated with tear-out and replacement. Use stamped concrete overlay to designate pedestrian zones. Durável SOM is engineered to handle heavy vehicular traffic on entryways and crosswalks.
